No. 99

MAY OPEN BIG RESERVE IN OCTOBER

INDIAN LANDS ARE ALLOTTED—OPENING ONLY AWAITS PRESIDENT'S PROCLAMATION.

W. Casson, allotment agent for the interior department, is in this city today.

He says the allotment of lands on the Walker river reservation has been completed and that all that remains now to throw open the reservation for settlement is the president's proclamation setting the date.

This is good news as it is almost certain that the land will be open for settlement by the middle of October.

The Walker River reservation has been a lode stone to miners for half a century, ever since it was set aside for reservation purposes. There are immense leuges of gold, silver, copper and iron ores in the mountains of this tract, and rich strikes have been made several times by miners who were able to sneak past the lines and do a bit of prospecting work.

In addition to the mineral lands are enormous areas of agricultural lands through and past which the Walker river pours a continuous flood of water that can be used for irrigating these same lands.

It is almost certain that forest reserves will be declared, that certain lands will be held from entry for reclamation purposes, and that the government will proceed to construct irrigation works as soon as possible after the lands are thrown open.

GOV SPARKS TALKS FISH AND A LITTLE POLITICS

Governor Sparks returned to Carson City today from his outing in Elko county. He has been fishing on Big Goose Creek which runs into Snake river.

He landed one hundred and fifty trout weighing from three quarters to a pound and a half and they were fish native to the waters of the creek, never having been planted by a fish commissioner. He looked for elk and grouse but found none. He is looking well after his trip and the game has evidently agreed with him.

He reports that the prospects of Bryan being a presidential candidate in 1938 is causing men who sided with Parker in the last election to announce that they are coming back to vote the fusion ticket this fall.

RAMSEY RECORDER

The "Ramsey Recorder" is the latest addition to the journals of the State of Nevada.

The new paper will be issued on or about August 4. A plant is on the way to the new camp, and actual work of getting out the first issue is well under way.

The temporary office of the Recorder is at the Appeal office, and the main office will be at Ramsey by Monday.

Will Harrington will have the active management of the business.

The old way of getting a pair of glasses by picking them out at a store or selecting a pair from the stock of a peddler is dangerous. No thinking person who values his sight will do that now. Go to a specialist and have your eyes examined and vision tested scientifically is the modern way. Examination FREE. Dr. Goldberg, Graduate Refractionist, Room 36, Park Hotel.

MARTIN LUTZ IS TURNED LOOSE

This afternoon the supreme court handed down a decision in the case of Martin Lutz, sent to jail by Judge Murphy for contempt of court in not paying alimony to his wife. It was believed that Lutz had money and was able to pay the alimony but no one has ever been able to locate his wealth; meanwhile he has spent several weeks in the county jail of Ormsby waiting for the court to pass on his case.

The supreme court held that there had been no proof that he had the money to pay the alimony, and that he could not be imprisoned for not doing something he was unable to do, and that there was no law imprisoning a man for debt in Nevada.

Lutz was accordingly allowed to go and after the heat and mosquitoes and bedbugs of the hotel de Kinney his liberty was very acceptable.

The divorce trial was set in Judge Murphy's court for Monday.

DAMAGE DONE IN VIRGINIA BY THAT "RAINSTORM"

That "rainstorm" at Virginia City yesterday afternoon was a real storm.

The Pioneer laundry was wrecked; the road to the Utah mine was destroyed; every bridge in Six Mile Canyon is out; four cords of wood floated down C street; Charles Livingston was all but drowned; a big wagon was swept away and ruined; huge boulders rolled down the streets in the flood of water; Bob Gies' place was washed away; the Wells Fargo building was struck by lightning; the slugs at the Butters plant were destroyed; Tom Carney's sluices were washed out; five feet of debris blocked traffic at the stone bridge near Billy Hill's; a wall of water three feet deep swept down the mountain through the city, and several smaller accidents happened.

For a rainstorm that was not a cloudburst, the effect resembles very closely a real sure enough cloudburst viewed from this distance, but it may not have been anything but a rainstorm.

One of the prettiest sights in this pretty valley is a field of wheat on either side of the prison road.

A doctor in Goldfield has been thrown out of his buggy the third time by the same runaway horse, and has suffered a broken ankle each time.

Champagne corks popped in Cherry Creek on Monday night when the arrival of the Nevada Northern railroad was celebrated with a banquet given in honor of the officials of the line.

There is a great deal of work being done on the copper mines at the North end of Lander county, and Battle Mountain is enjoying a small boom in consequence.

The deposits of antimony adjacent to Lovelock are attracting the attention of the metal dealers and mining men from all directions. We doubt if there is a point in the United States which has so much high grade antimony adjacent to it as Lovelock.

Manhattan is fast becoming a placer camp. All it needs is water to make it a haven for placer miners, and almost within the town are miners at work with dry washers. All of them are making better than wages, and placer leases are much sought after from the owners of claims.

A new line of Eastman Kodaks has arrived at Kitzmeyer's drug store. Just the thing for campers and to take on a vacation trip.

PHOENIX-ROYAL WON'T PAY

BALKS SQUARE ON TECHNICALITY OF THE EARTHQUAKE CLAUSE—NEVADA COMMISSIONER INVESTIGATES.

SAN FRANCISCO, July 25.—The agent of the Phoenix-Royal insurance company of Austria has received the following notice:

"To the claimants of the Austrian Phoenix Royal Imperial Privileged Insurance Company of Vienna, Austria: We wish to convey to you the instructions received from the home office of this company at Vienna, Austria, viz: That all claims that have been filed against this company by reason of the earthquake which occurred on the morning of April 18th, 1906, are invalid, as all policies of this company become null and void by said earthquake as the same was wholly responsible for the conflagration that followed.

W.W. WITT, Delegate.

Wm. Keady, Auguster.

CELLS NEAR COMPLETION

Things are moving along at the prison and the cement floor is being put in the new cell room, to be ready when the cells are properly hooked up.

When finished the cell room will be one of the best in the country. Each row of cells in each tier may be closed at once by a patent device that operates from outside the tier. In case of fire or panic, or for any other reason whatever, all the cells may be thrown open at once, and each may be opened or closed as desired, without interfering with the door of any other tier.

The prisoners are doing most of the work under the direction of two skilled mechanics furnished by the contractors. Everything but the iron is furnished at the prison, the rock and cement work being done by the prisoners themselves.

ABOUT ELY

A write up of Ely, which appeared recently, had this among other things to say about the rejuvenated copper camp:

The history of Ely is the history of nearly all of the old mining camps of the west, when, during the time of their prosperity, prior to the year 1875, when silver was demonetized, hoards of populations running up into the thousands. With the demonetization of the white metal these thrifty and populous camps gradually dwindled down until nearly every building was vacant and until the streets presented an appearance of desertion and desolation; until but few persistent and persevering families and individuals remained, hoping against hope that the day of resurrection of their camp might come. And come it has, for 1900 brought in its wake a reawakening in mining affairs, an era of investment—and those who have stayed with their mine holdings for all these years are now reaping their reward. Nearly all now have a few thousands to their credit in the bank, while a few have "money to burn."

"Ely is very prettily located near the mouth of Robinson canyon. The site is picturesque, with plenty of room for building and other improvements. In the outskirts of the town there are a number of pretty and tasty homes, surrounded by lawns and trees.

Dr. Goldberg is a graduate of one of the foremost Optical Colleges of the United States, the technical scientific training received there places him in a position to do thorough optical work. Examination FREE. Room 36, Park Hotel.

DON'T WORRY, WATCH US GROW

The Nevada Investment Company was incorporated this afternoon, with Geo. W. Cowan, president; C. F. Nichols, secretary; Geo. T. Mills, treasurer; H. A. Lemmon, P. V. Mighels and H. R. Mighels, directors.

The purpose of the company is to handle all classes of mining securities, stocks, and bonds and to promote properties of merit in northern and western Nevada.

The company has taken office rooms in the Withersell building, which will be thrown open to the brokers and mining men of Southern Nevada. A room will be fitted up for the special use of mining men, in which they will find all mining papers, maps and data that will lend assistance to them in their work with the mining industry of this section of the country, and the state general.

The company will connect with the long distance wire between New York and San Francisco and will have the reports of both call boards as fast as they are made.

A complete staff of stenographers will be employed as needs arise, and the office will add another enterprise of worth to the city of Carson.

It is the intention of the new company to get right down to business and a revival of mining in this and other sections tributary to Carson City is a foregone conclusion.

Don't worry, watch us grow. Boost and get into line and make some money. The mines south, the mines east, the big reclamation projects, the opening of Valley Park, the construction of a street railway, the rejuvenation of the whole territory tributary to Carson City, all are clamoring for the attention of those from whom attention is due; so get busy.

MORE NEW RESIDENTS

Dr. Goldberg, who has been in this city for some days practicing his profession, has been made happy by the arrival of Mrs. Goldberg.

He announced this afternoon that he intends to live here in future, will buy or build a home, and add himself to the community. People like these are more than welcome in this city, and many more of them are coming.

DEMOCRATS OPEN UP

CHICAGO, July 25.—The western division of the democratic congressional committee will open headquarters at the Palmer House in Chicago, August 1. Final arrangements were made by Congressman Henry T. Rainey, of Carrollton, Ill., and James T. Lloyd of Missouri, who were appointed by Chairman James M. Goggs of the congressional committee to direct the movement.

Lloyd will be in charge, assisted by Rainey. The western division will include Ohio and all northern states west of the Mississippi river, except Texas, Arkansas and Louisiana.

RAMSEY STAGE LINE

The map of the proposed route of the Silver Peak railroad from Blair Junction on the Goldfield and Tonopah railroad to Blair, in the Silver Peak district, was filed in the controllers office today.

ORDER YOUR COAL NOW

WINTER FUEL COAL: Persons that want coal this winter will please specify the amount to the MEYERS MERCANTILE CO. in order that storage arrangements can be made for it, and the situation of last winter be avoided. We have but a limited amount of storage, but by ordering NOW we can arrange for more.

MEYERS MERCANTILE CO.

SUPT. M'KINTY IS DEAD

"FRIEND OF ALL VIRGINIA" PASSES AWAY AFTER A USEFUL LIFE—BELIEVED ALWAYS IN FUTURE.

James McKinty, superintendent of the C. & C. mine and allied properties in Virginia City, is dead.

The dreaded miners' consumption at last triumphed over medical skill and the friend of all Virginia passed away this morning at his home at that place.

Deceased was one of the best known and most public spirited men on the Iode, and has done a great deal to keep the old camp together. He never made a promise to his directors that he did not fulfill, and when he advised extensions or increased work, his advice always was followed.

A thorough optimist, he believed to the day of his death the Comstock will revive, and that by modern methods of mining, the old veins can be opened once more and her golden flood restored once more to the channels of commerce.

McKinty was appointed to succeed Ryan, was 58 years of age, and left a family in moderate circumstances.

The funeral arrangements have not yet been completed.

THIS HONEYMOON IS TO BE A TRIPLE PLATED ONE

The coming entertainment of the Leisure Hour Club promises to be something particularly unique. The young ladies are drilling industriously and some of the features are of the most novel variety.

The costumes will be something gorgeous, the musical features something delightful, and the general stage effects surpassing anything ever attempted in Carson City.

All the talent in Carson City has been grabbed to make this affair a success and the people handling it propose to surprise the town.

FIRE DESTROYS SUISUN

SUISUN, Cal., July 25.—A fire which started here at 3:40 o'clock last night burned until 9 o'clock causing a loss of \$100,000. Five entire blocks, including twenty residences and eight business plants were destroyed. The fire was checked before reaching the main business district by the combined efforts of the local fire department and the departments from Vallejo and Benicia.

Ed. Patterson will leave this morning for Hawthorne to go some work, and look after mining claims.

Will Harrington has resigned from the state printing office to take charge of the office of the Ramsey recorder.

The man that gives a newspaper a false piece of bad news is about on a level with the man that yells fire in a theatre, or that sits in front of a business house and makes remarks about women.

ORDER YOUR COAL NOW

WINTER FUEL COAL: Persons that want coal this winter will please specify the amount to the MEYERS MERCANTILE CO. in order that storage arrangements can be made for it, and the situation of last winter be avoided. We have but a limited amount of storage, but by ordering NOW we can arrange for more.

BREVITIES

The Junior '04 class had a delightful time at the Armory last night.

Como mining district is on the boom.

Mrs. Dr. Goldberg is visiting her husband in this city.

Major, O. F. Aiers, a brother of Mrs. A. J. Cushing is paying her a short visit before he goes to the southern mines. The two have not met in 42 years.

Samuel Morris and Chris Yager left today for Cat Creek, to look at some mining properties.

B. J. Sweetland and Prof. Smith will open the Park theatre shortly, formerly the Kluttscope.

Information as to the whereabouts of Martha Lang is wanted by Mrs. M. L. Day, of Berkeley.

Beggs Bros. have refused \$15,000 for their claims in Ramsey.

The Ramsey townsite company has sold lots to the amount of \$24,000.

The county commissioners and city trustees will meet tonight to take action on the application for a franchise to lay street car tracks and operate a trolley line in this city and county.

The body of W. R. Kidd, who died in Gardnerville, was brought here yesterday. Kidd was enroute from Elko, Nev., to California and became ill in Gardnerville. The body will be sent to Elko.

Emeralda is the name of a new camp north of Reno, where it is said all sorts of valuable ore has been found.

A new townsite has been laid out at Nashville, north of Reno.

The judges of the Supreme court will take a vacation in August.

Bids for the shooting range were inadequate, and all were rejected. One was \$325 and one was \$250. The property will not be sold for less than \$500.

The Manhattan Mail has broken the record by printing the story of a gold strike in gilt ink. That's a new kind of yellow journalism.

An open call for stock is now part of Manhattan's business.

The first machinery to be installed at Round Mountain is that on the Sphinx property.

The telephone line is being extended from Manhattan to Round Mountain as fast as possible.

Samples of Miller Lake flat, a huge placer field, give values as high as \$9 a yard. Preparations are being made to work 3,000 acres of this ground on a large scale.

The Mono county supervisors have bought a piece of property for \$3500 that was advertised for sale at \$2200, and the Bodie Miner wants to know who got the \$1300 difference.

The Masonic Pioneer tells of a jail break at Carson City. When did it happen, how did it happen and who got away? The Pioneer also has things to say about "Nevada's farical laws." Is it on account of these same farical laws that the counties east of the Sierras are asking for admission to Nevada? Selah.

The mail was delayed two hours this morning, trouble with connecting lines.
